

LA CULEX WHITEPAPER

A mosquito that went full degen, picked up a ledger, and started buzzing around Crypto Twitter. 🦟 That's La Culex, tiny wings, massive impact.

Annoying the bears, one buzz at a time.

This whitepaper is provided for informational purposes only and does not constitute financial, investment, or trading advice. La Culex (\$CULEX) is a community-driven meme token and should not be considered a security or regulated financial instrument in any jurisdiction. Participation in the presale or purchase of \$CULEX tokens carries inherent risk, including the potential loss of capital.

Nothing in this document should be interpreted as a guarantee of returns or future performance. Past references to token burns, staking rewards, referral systems, or community events are subject to change based on project needs and market conditions.

By participating in La Culex, you acknowledge that you are doing so voluntarily, at your own risk, and in compliance with the laws and regulations of your jurisdiction. Always conduct your own research (DYOR) and consult with a qualified financial advisor before making investment decisions.

La Culex, its team, and community members are not liable for any direct, indirect, incidental, or consequential damages arising from participation in or interaction with the project.

1. What is La Culex?

Every empire starts with a spark. For La Culex, it starts with a buzz on Ethereum.

La Culex isn't here to sit quietly! It's here to swarm, to sting, and to suck liquidity straight from the bears. Think of it as crypto's most annoying mosquito: small but relentless, buzzing in every ear, impossible to ignore. While the swarm grows, the supply shrinks, each "burn" a playful bite out of \$CULEX itself, making what's left even juicier.

It is a meme-charged ecosystem where referrals grow the swarm one bite at a time, the Hive Vault powers loyalty with wings charged and rewards flowing, Blood Drops keep the colony buzzing with surprises when least expected, and Itchy Burns sting the supply stage by stage, making every remaining token juicier.

La Culex turns irritation into domination. What begins as a tiny buzz swells into a swarm, wings sharper, bites harder, and the bears are left drained.

Welcome to La Culex.

Annoying the bears, one buzz at a time.

2. Mission: Fuel the Swarm, Drain the Bears!

La Culex was born with a simple mission: turn every buzz into unstoppable swarm energy. We're not here to quietly exist in the corner of crypto! We're here to sting, suck, and spread until the swarm can't be ignored.

Our mission is threefold:

- **Grow the Swarm:** Referrals are the lifeblood, each new member adding volume, energy, and buzz.
- **Reward Loyalty:** The Hive Vault turns holders into long-term swarm members, giving back to those who charge their wings and stay.
- **Create Scarcity:** With every Itchy Burn, supply thins, making what's left even juicier for the swarm to feast on.

La Culex is built to annoy the bears, empower the swarm, and keep buzzing louder every stage. On Ethereum, with staking, referrals, giveaways, and burns, the mission is clear: turn irritation into domination.

3. Tokenomics: The Buzz Behind the Numbers

The strength of any swarm depends on how well its energy is shared. With La Culex, every token has a purpose: to power growth, reward loyalty, and make the swarm itchier with every burn.

Total Supply: 200,000,000,000 \$CULEX

Here's how the swarm divides its energy:

- **45% Presale (90B):** Igniting the swarm from the very first buzz.
- **20% Liquidity (40B):** Locked for 18 months, proving this isn't a one-night sting.
- **15% Meme Hive (30B):** Reserved for referrals, marketing, and collabs that spread the buzz far and wide.
- **15% Staking Rewards (30B):** Fuel for the Hive Vault, rewarding swarm loyalty with juicy 80% APY.
- **1% Burn Juice (2B):** Set aside for milestone burns, every sting making the supply scarcer.
- **4% Team (8B):** Vested for 18 months, because even the swarm leaders play the long game.

In one line: Enough supply to swarm, enough burns to itch, enough locks to prove this isn't a one-night sting.

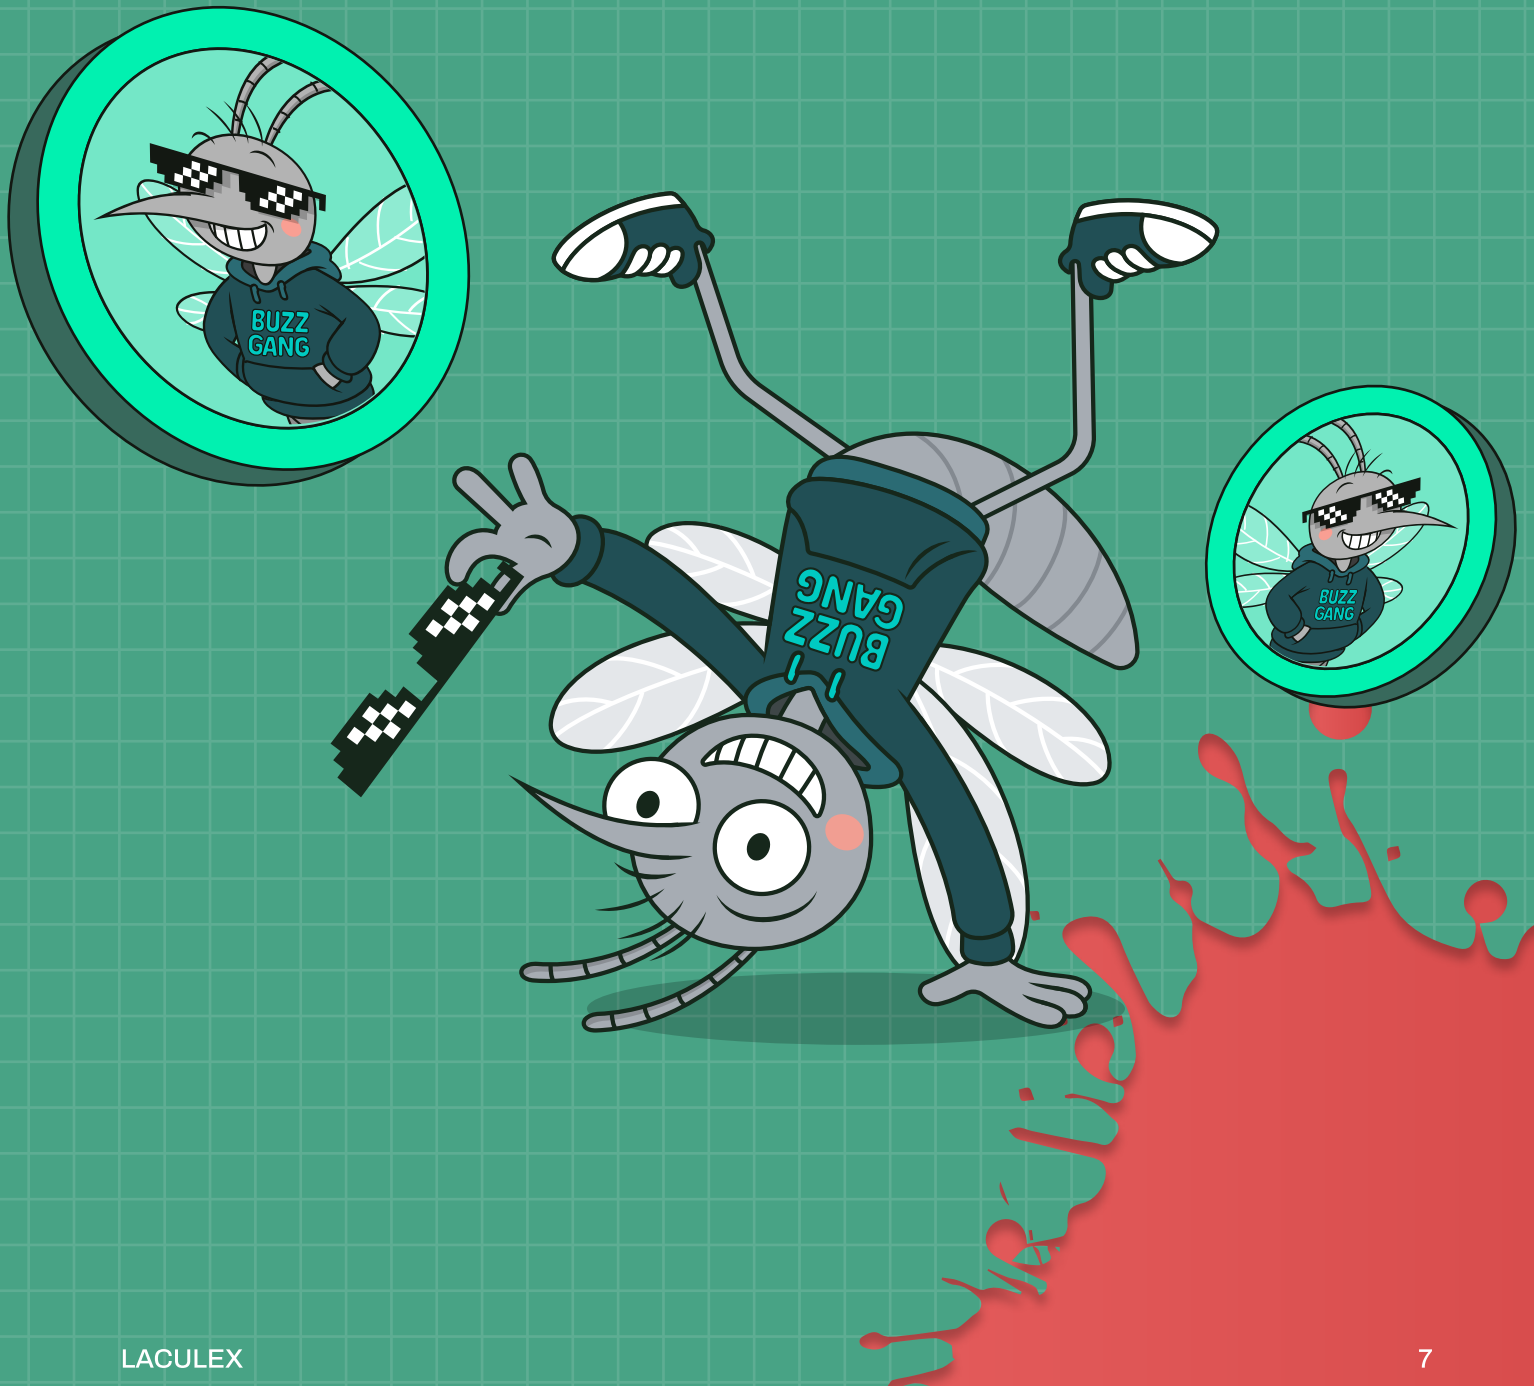

4. Presale: The Swarm Crawl

The La Culex presale is where the buzz begins. Spanning 160 days across 32 stages, each lasting 5 days, the swarm grows bite by bite as tokens become scarcer and prices climb. With 90B \$CULEX (45% of supply) reserved for early believers, the presale fuels the swarm's ignition while keeping momentum alive. Starting at just \$0.00001947 in Stage 1, the crawl builds toward a listing price of \$0.007, giving the swarm plenty of room to sting the bears and reward early supporters. From the tiny bite at the start to the full sting at launch, every step charges the hive for takeoff.

Buzz Stage Narratives: Full Swarm Breakdown

- 1. First Bite Frenzy:** The swarm awakens, first buyers feel the sting, ROI insane, bears scratching already.
- 2. Midnight Hum:** Degens hear the hum on X at 3 AM, swarm raids begin, FOMO buzzing.
- 3. Bug Spray Dip:** Bears try spraying FUD, but the swarm multiplies, hype climbs.
- 4. Hive Signal:** The swarm's first global ping, charts buzz, DMs blow up, raids intensify.
- 5. Blood Moon Bite:** Mosquito chest glows red, burns slash supply, the swarm feeds harder.
- 6. The Scratch Begins:** New apes itch to join, scratching charts green with volume.
- 7. Itchy Charts:** Price candles wobble, the swarm makes every tick feel like a bite.
- 8. Swarm Shadows:** Dark night raids, stealth memes flood timelines, bears hide in fear.
- 9. Night Flight:** Midnight squadron takes off, buzzing through X threads with endless memes.
- 10. The Big Swarm:** Sound barrier breaks, X feeds flood with memes, the bite can't be ignored.
- 11. Degen Drip:** Every wallet drips fresh bites, degens flex swarm stacks, FOMO spreads.
- 12. FOMO Fever:** Apes pile in, swarm energy fever-pitched, bears sweating.
- 13. Buzz Storm:** A storm of memes crashes through CT, thunderous swarm hype.
- 14. Hive Surge:** Hive unites, raid energy surges, engagement numbers explode.
- 15. Sting Operation:** Coordinated swarm stings flood enemy threads, swarm takes over.
- 16. Green Itch:** Red candles flip itchy green, swarm won't stop scratching higher.
- 17. Bag Buzz:** Early apes brag about swollen bags, latecomers still buzzing to join.
- 18. Hive Mind:** The swarm syncs, posting and buying in perfect rhythm.
- 19. Swarm Season:** New holders migrate in, charts blossom, bears mauled.
- 20. Hyperswarm:** The swarm doubles in strength, and every meme turns viral.
- 21. Raid Frenzy:** 24/7 raid missions, swarm invades trending tags, hype spirals.
- 22. Hive Collapse:** Bear resistance collapses, swarm claims new price highs.
- 23. Blood Harvest:** Burn events slash supply, swarm feasts on scarcity.
- 24. Buzz Riot:** Meme riots erupt, swarm celebrates nonstop with green walls.

- **25 Itch Protocol:** Protocol engaged, every ape who missed earlier stages is now scratching.
- **26 Swarm Strike:** Coordinated strike, memes hit like swarms of mosquitoes on a summer night.
- **27 Hivequake:** The hive trembles the ground, CT timelines quake with swarm content.
- **28 Moon Bite:** Swarm bites pierce resistance, charts fly, bears vanish.
- **29 FOMO Sting:** FOMO stings latecomers, even if they can't resist the buzz.
- **30 Final Swarm Wave:** The last presale wave, hype peaking, swarm unstoppable.
- **31 Diamond Buzz:** Swarm diamond-hands shine, nothing shakes the hive.
- **32 Apex Swarm:** Presale finale. Liquidity locked. Scarcity max. The swarm arrives in full force.

5. The Hive Vault: Charge Your Wings

Every swarm needs a place to rest, recharge, and grow stronger. For La Culex, that place is the Hive Vault, a staking hub designed to reward loyalty and keep the wings buzzing. Holders who stake their tokens earn an impressive 80% APY, with a 30-day lock period that ensures stability for the hive and strength for the colony.

Rewards are paid directly in \$CULEX, allowing the community to grow from within, while contracts are carefully checked pre-launch to keep everything swarm-safe. Backing it all, 15% of the total supply, 30B \$CULEX, has been reserved exclusively for staking rewards, ensuring long-term energy for those who commit to the hive. The Hive Vault turns holding into fuel, sending the culex back out with wings charged and stings sharper than ever.

Don't spray it, stake it.

6. The Itchy Burns: Scarcity That Stings

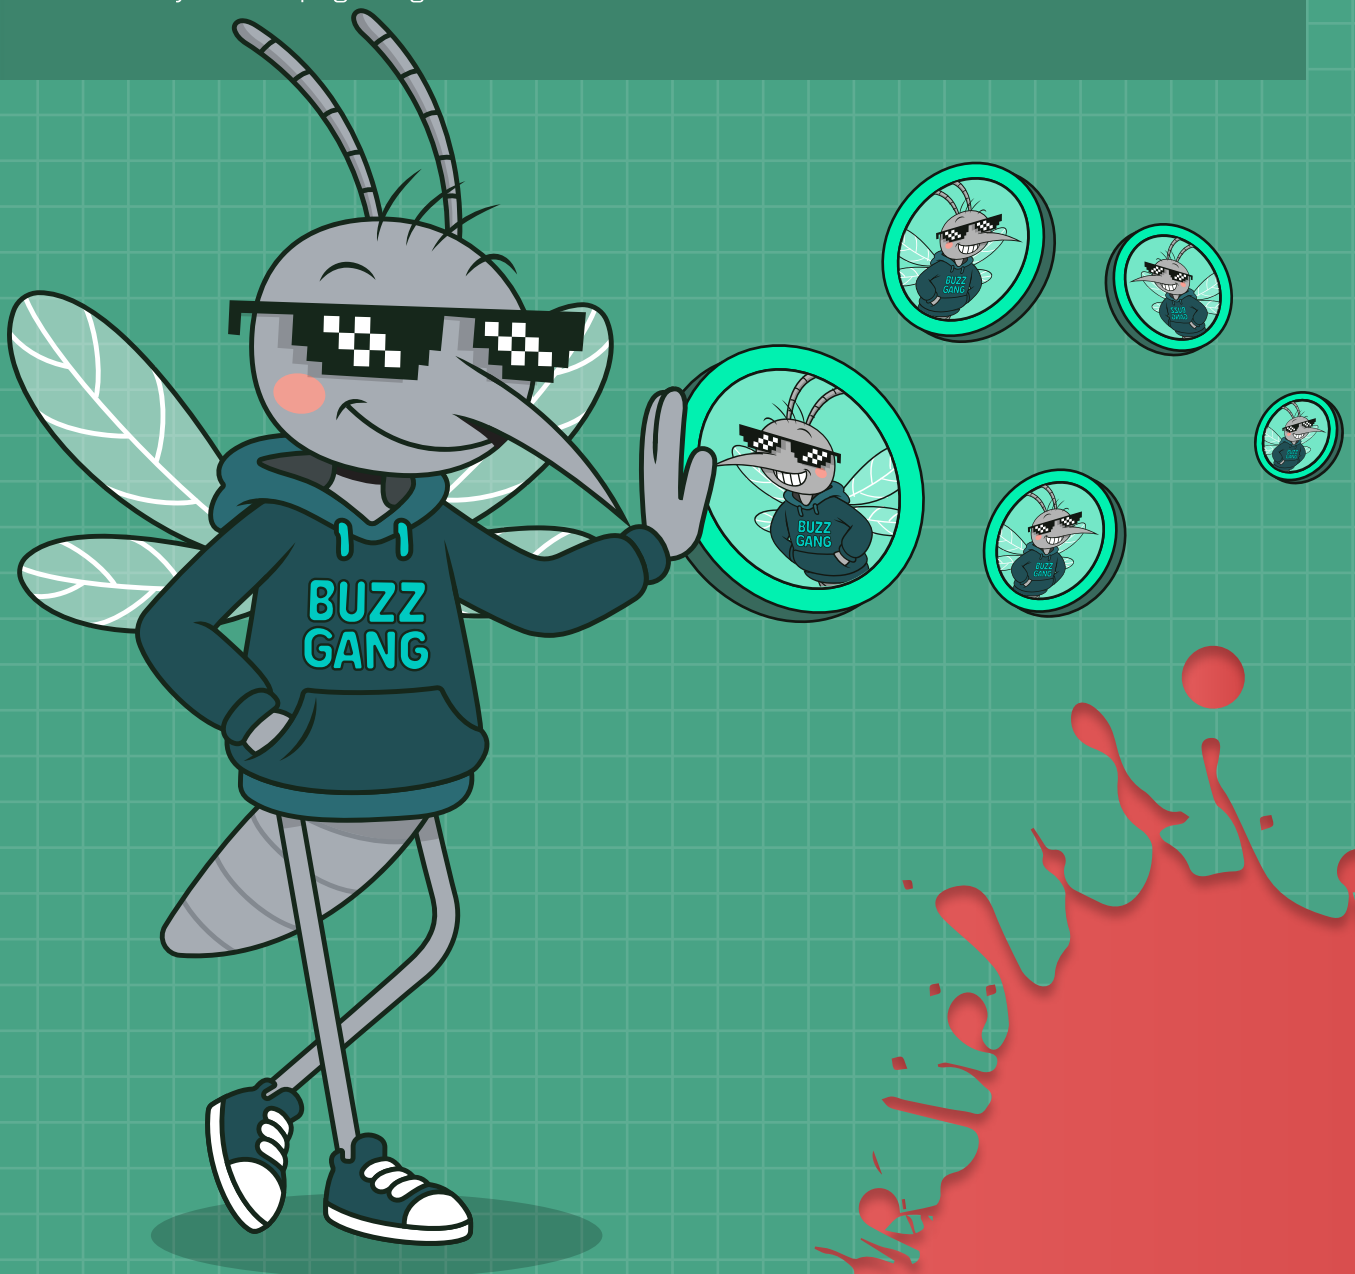

La Culex was built to grow, but also to shrink. The Itchy Burns remove tokens from circulation in steady jolts, making every stage leaner and every holder's share more valuable. A total of 2B \$CULEX has been reserved for this purpose, divided into 32 Buzz Stages. With every burn, the swarm gets lighter, the supply tighter, and the bears left scratching.

7. The Bite Chain: Referrals that Spread the Swarm

A single mosquito bite is annoying. A chain of bites is impossible to ignore. That's the power of La Culex referrals: every time a swarm member brings in a new holder, both get rewarded. It's called the Bite Chain, and it pays 12% to the referrer and 12% to the referee, turning growth into a two-way reward system. The more you spread the buzz, the louder the swarm becomes, and the faster it drains the bears.

To keep this system buzzing, a portion of the 15% Meme Hive allocation (30B \$CULEX) has been reserved to fuel referrals, ensuring there's always fresh energy backing every bite. This makes expansion sustainable; every holder becomes a recruiter, every recruit becomes a recruiter, and the community never stops growing.

8. Roadmap: The Culex Lifecycle!

Q3 2025 — Phase 1: Egg Hatch (Pre-Presale)

The swarm begins to form. The La Culex whitepaper hatches, the website launches with buzzing visuals, and the contract is deployed and audited. Early hype campaigns light the spark, preparing the swarm for growth.

Q4 2025 — Phase 2: Larva Crawl (Presale)

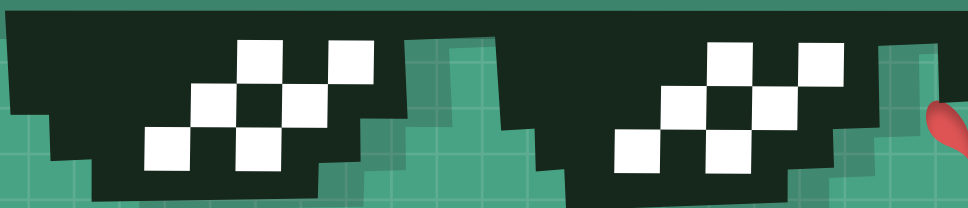

The colony starts feeding. The 32 Buzz Stages go live across 160 days, with Itchy Burns shrinking supply at each step. Meme campaigns and mascot lore drops spread the buzz as the hive gets stronger.

Q1 2026 — Phase 3: Pupa Rise (Launch)

The swarm transforms. \$CULEX launches publicly on Ethereum, liquidity is locked for 18 months, and exchange listings begin. The Hive Vault staking pool opens, rewarding loyal members and proving the colony is ready to sting.

Q2 2026 — Phase 4: Adult Swarm (Post-Launch Growth)

The swarm takes flight at full strength. Collaborations with meme colonies expand reach, community merch like Buzz hoodies, and continued burns keep scarcity alive. Global swarm raids amplify the buzz until La Culex is everywhere.

9. Token Summary: \$CULEX at a Glance

Token Name: La Culex

Ticker: \$CULEX

Blockchain: Ethereum (ERC-20)

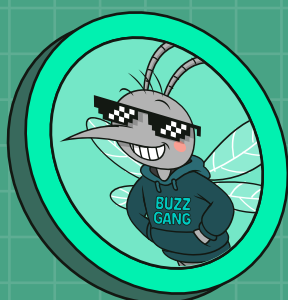

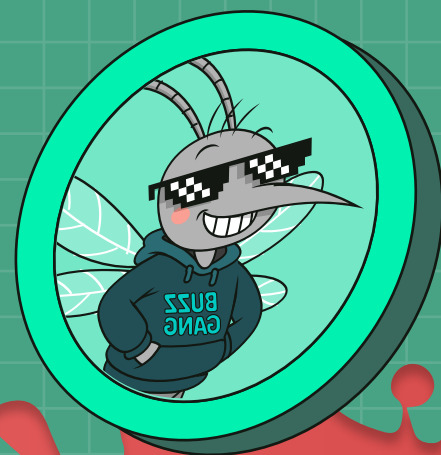

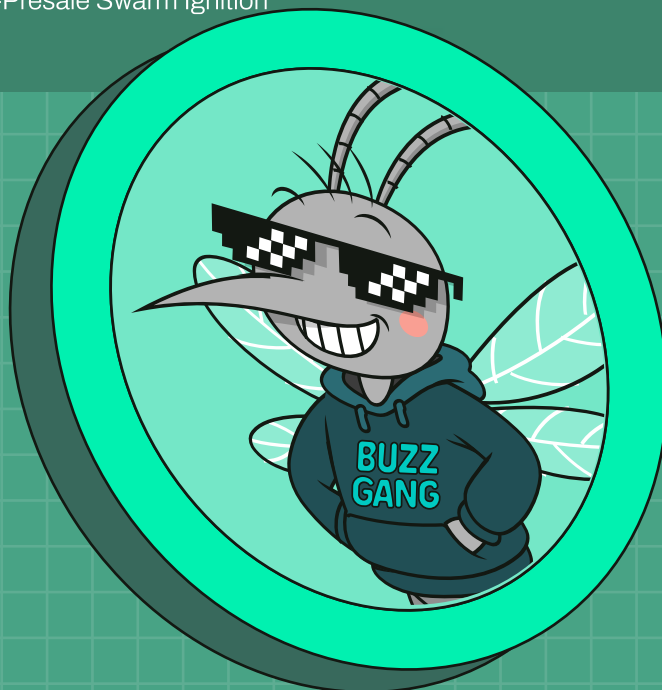

Total Supply: 200,000,000,000 (200B)

Contract Address:

Presale Allocation: 90,000,000,000 (90B)

Presale Stages: 32

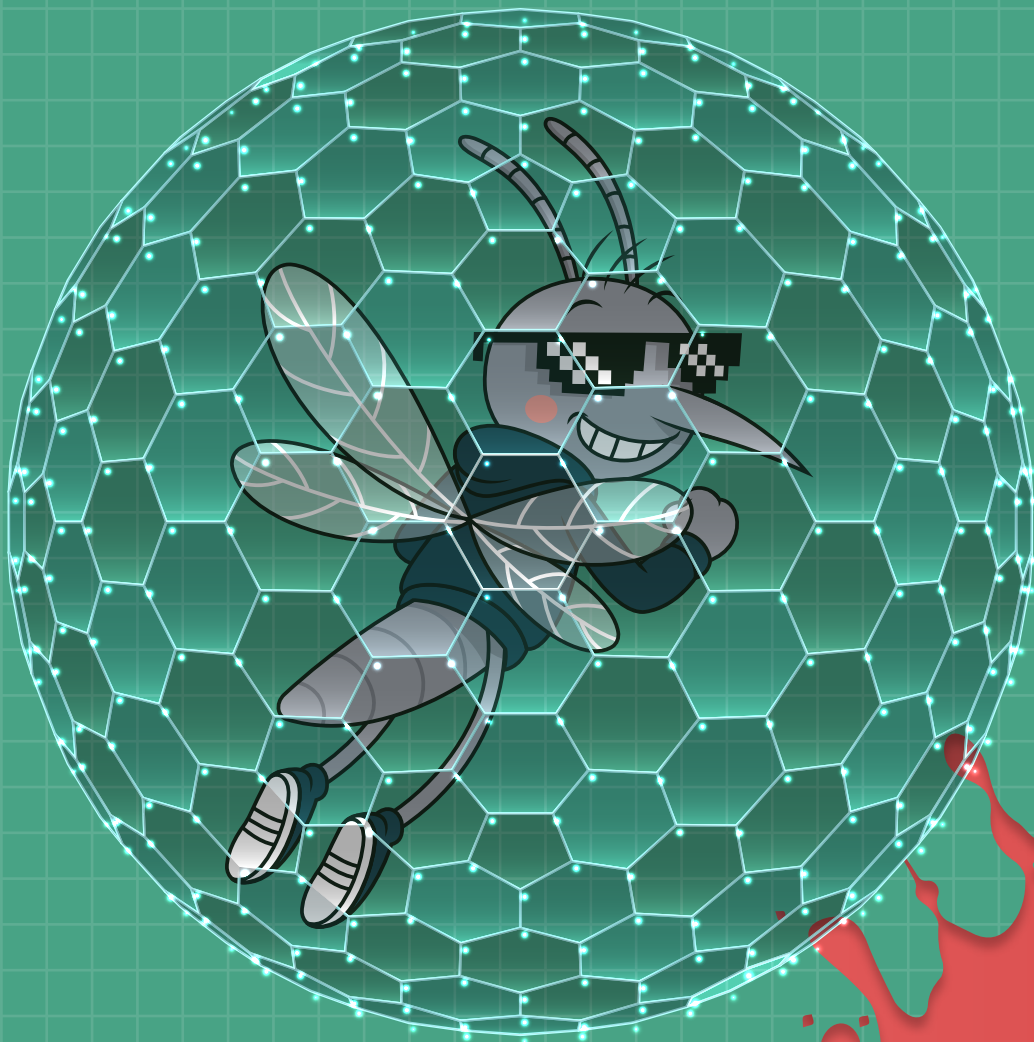

Launch Style: Micro-Presale Swarm Ignition

10. Trust & Safety: Built to Last

La Culex is designed with transparency and security at its core. Liquidity is locked for 18 months, proving this isn't a one-night sting. Taxes are set at 0/0 forever, ensuring trades flow freely without hidden costs. After safety checks are complete, the contract will be renounced, placing control fully in the hands of the community.

There are no blacklist functions, no honeypot traps, and no shady mechanics, only clean, verifiable code. Communication stays open, pinned, and transparent at all times, so holders always know exactly what's happening.

11. FAQs: Questions That Keep Buzzing

What is La Culex?

La Culex is an Ethereum-based meme token with real mechanics, referrals, staking, giveaways, and burns, all designed to create growth, reward holders, and reduce supply over time.

What makes La Culex different from other meme tokens?

While many tokens fade after the first bite, La Culex has a structured presale, locked liquidity, high-yield staking, a referral engine, and planned burns across 32 stages. It combines meme energy with sustainable mechanics.

Is there a tax on buys or sells?

La Culex is 0/0 forever, no entry tax, no exit tax. Every trade is clean.

How do referrals work?

Our referral system, the Bite Chain, gives 12% to both referrer and referee, funded from the Meme Hive allocation. Growth is two-way; when you bring in a holder, you both win.

How do I earn staking rewards?

Holders earn 80% APY when CULEX is staked during the presale, Staking rewards will be vested for 30 days post presale.

How are burns structured?

La Culex has a 2B burn reserve, released across 32 Buzz Stages, with 62.5M tokens burned at each stage. Every burn makes the supply scarcer.

Is the contract safe?

Yes. The contract is audited, renounced after safety checks, with no blacklist or honeypot functions. Liquidity is locked for 18 months.

Where can I trade \$CULEX?

After launch, \$CULEX will list on Ethereum DEXs first, with CEX listings planned as the project grows.

What are Blood Drops?

Blood Drops are giveaway competitions, meme contests, referral races, and community challenges, with rewards paid out in \$CULEX, funded from the Meme Hive.

How can I get involved?

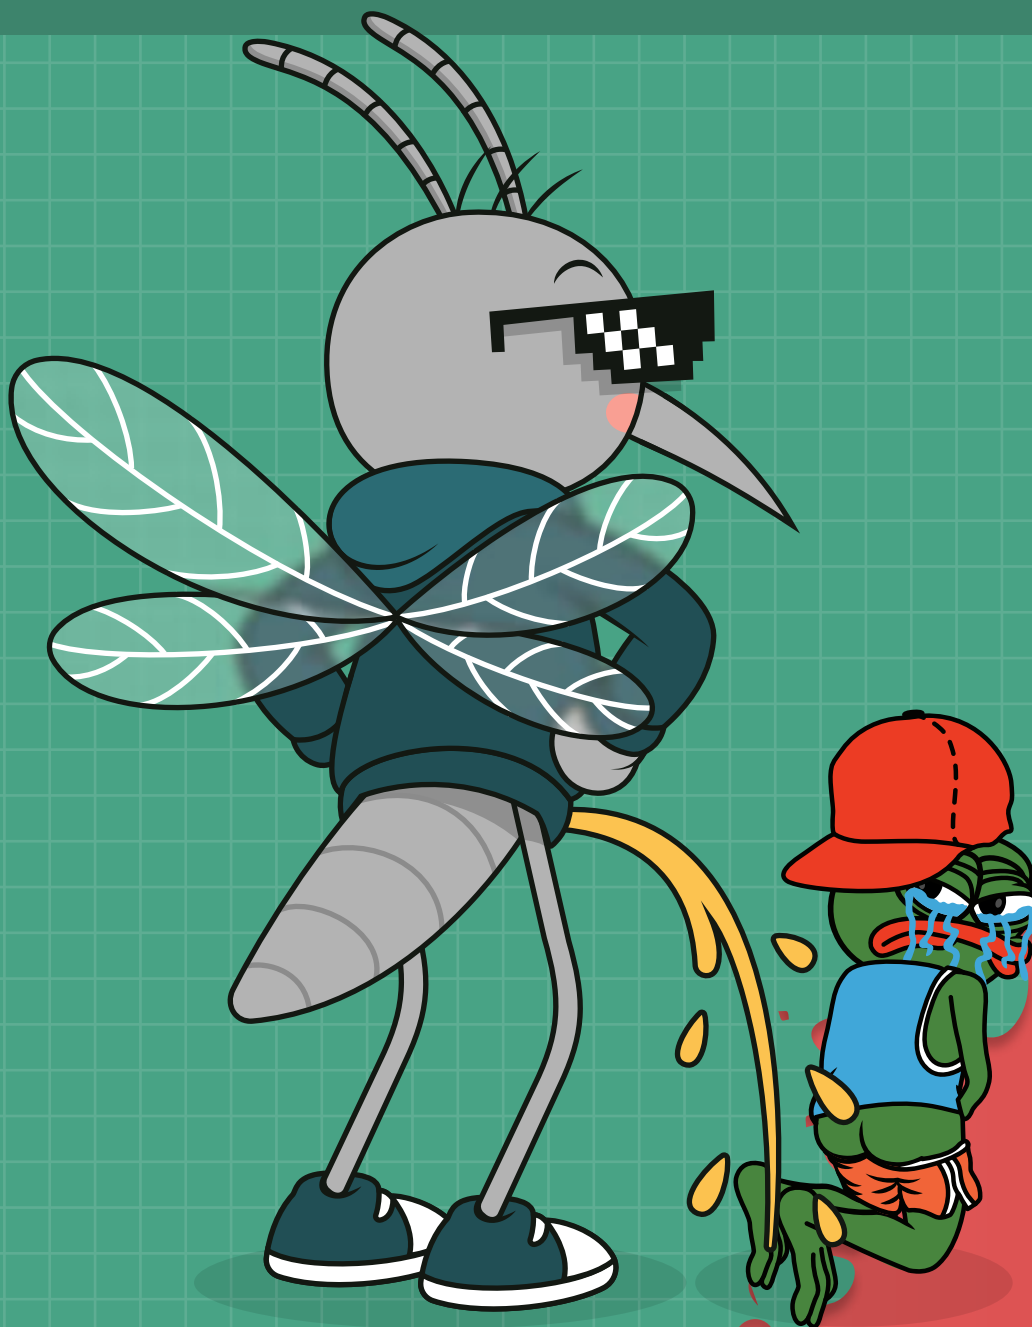

Join early, take part in the presale, spread the buzz through referrals, stake in the Hive Vault, and stay active in competitions. Every holder is part of the growth.

12. The Final Buzz

La Culex is a meme coin built to grow, reward, and endure. With referrals fueling expansion, staking powering loyalty, Blood Drops keeping engagement high, and Itchy Burns driving scarcity, the foundation is simple but powerful. Backed by locked liquidity, zero taxes, and transparent communication, it's designed to be safe, fair, and built for the long haul.

From its first bite to full flight, La Culex is set to annoy the bears, reward its holders, and keep buzzing louder with every stage. Whether you join for the memes, the mechanics, or the community, one truth remains: the buzz has started, and it's only getting stronger.
